2006

НАУЧНО-ТЕХНИЧЕСКИЙ И ИНФОРМАЦИОННО-АНАЛИТИЧЕСКИЙ ЖУРНАЛ

## РЕДАКЦИОННЫЙ СОВЕТ

### Сопредседатели:

**В.Л. Александров**, генеральный директор  
ФГУП «Адмиралтейские верфи»,  
президент ЦП НТО судостроителей  
им. акад. А.Н. Крылова

**К.П. Борисенко**, ректор СПбГМТУ

### Члены совета:

**С.П. Алексеев**, начальник  
ГНИНГИ МО РФ

**А.С. Бузаков**, генеральный директор  
ОАО СЗ «Северная верфь»

**Л.Г. Грабовец**, генеральный директор  
ОАО СФ «Алмаз»

**В.В. Дударенко**, генеральный директор  
ОАО «Судпромкомплект»

**В.Н. Киреев**, начальник-главный  
конструктор ЦКБ «Балтсудопроект»

**Э.А. Конов**, директор  
ООО Издательство «Мор Вест»

**Л.Г. Кузнецов**, генеральный директор  
ОАО «Компрессор»

**А.П. Матлах**, генеральный директор  
ООО НПО «Полярная звезда»

**Н.В. Орлов**, председатель  
Санкт-Петербургского Морского собрания

**А.М. Соловейчик**, председатель Совета  
директоров ОАО «Ленполиграфмаш»

**В.А. Солонько**, генеральный директор  
ЗАО «НПО «Севзапспецавтоматика»»

**В.Ф. Суслов**, генеральный директор  
ОАО «Пролетарский завод»

**В.С. Татарский**, генеральный директор  
ОАО «ЭРА»

**А.Н. Тихомиров**, генеральный директор  
ЗАО «Транстех Нева Эксбишнс»

**А.Б. Федотов**, генеральный директор  
ОАО «Новая Эра»

**Г.Д. Филимонов**, генеральный директор  
ЗАО Концерн «Мор Флот»

**В.П. Худин**, зам. генерального директора  
ОАО «Системы управления и приборы»

**А.В. Шляхтенко**, начальник-генеральный  
конструктор ФГУП ЦМКБ «Алмаз»

**В.Е. Юхнин**, генеральный конструктор  
ФГУП «Северное ПКБ»

### Редакционная коллегия

**К.Г. Абрамян**, д-р техн. наук, проф.

**Ю.В. Варганов**, канд. истор. наук, доцент

**Е.А. Горин**, д-р эконом. наук

**Е.В. Игошин**, канд. техн. наук

**Б.П. Ионов**, д-р техн. наук

**Ю.Н. Кормилицин**, д-р техн. наук, проф.

**С.И. Логачев**, д-р техн. наук, проф.

**Ю.И. Нечаев**, д-р техн. наук, проф.

**В.С. Никитин**, д-р техн. наук, доцент

**А.И. Короткин**, д-р техн. наук, проф.

**В.И. Поляков**, д-р техн. наук, проф.

**Л.А. Промыслов**, канд. техн. наук

**Ю.Д. Прянин**, д-р истор. наук, проф.

**К.В. Рождественский**, д-р техн. наук, проф.

**А.А. Русецкий**, д-р техн. наук, проф.

**Ю.Ф. Тарасюк**, д-р техн. наук, проф.

**В.И. Черненко**, д-р техн. наук, проф.

**Б.А. Царев**, д-р техн. наук, проф.

## СОДЕРЖАНИЕ

### СУДОСТРОЕНИЕ

- Передача Китаю второго эскадренного миноносца пр. 956ЭМ ..... 1*  
*ФГУП «Адмиралтейские верфи»: сдача в эксплуатацию танкера  
«Таврический мост» ..... 7*  
*«Адмиралтейские верфи» приступили к строительству второй  
серийной многоцелевой торпедо-ракетной подводной лодки ..... 9*  
*Закладка сторожевого корабля пр. 20380 для ВМФ РФ ..... 11*  
*Судостроительная фирма «Алмаз»: итоги и перспективы ..... 13*

### ДВИГАТЕЛИ, ОБОРУДОВАНИЕ И СИСТЕМЫ УПРАВЛЕНИЯ

- В.А. Солонько, В.Н. Круглеевский, В.А. Колесник.**  
*Методика оценки пожарной опасности в корабельных  
помещениях ..... 15*
- С.А. Иванов, А.И. Рыбников.** *Влияние длительной  
эксплуатации на сопротивление усталости турбинных  
лопаток ..... 19*
- И. О. Прутчиков, В.В. Камлюк, В.Н. Солдатов,  
В.В. Зорин, Н.А. Карельский, П.В. Крупко.**  
*Экспериментальные исследования работы реверсивного  
преобразователя энергии в составе системы гарантированного  
энергоснабжения с дизель-генераторной установкой ..... 23*
- В.Н. Василенко.** *Современный электромонтаж – верность  
традициям ..... 27*
- Д.В. Суслов, Н.В. Пялов.** *О совершенствовании  
механизмов силовых приводов успокоителей качки ..... 32*
- Корабел.РУ – информационно-поисковая система  
(участники раздела) ..... 36**
- Е.В. Королев.** *Повышение эффективности использования  
магистралей ГОСТ 26765.52–87 (MIL-STD-1553B), RS485, CAN  
в корабельных системах управления ..... 38*

### БЕЗОПАСНОСТЬ МОРЕПЛАВАНИЯ

- Б.Е. Иванов.** *О безопасности плавания по линейным  
навигационным створам ..... 42*
- В.П. Худин, В.Е. Салов.** *Тренажер по грузовым операциям  
сухогрузных судов ..... 46*

### ЭКОЛОГИЧЕСКАЯ БЕЗОПАСНОСТЬ

- С.П. Алексеев, М.В. Бондарь, М.И. Суржиков.** *Развитие  
систем охраны морских нефтегазовых комплексов ..... 51*
- А.Н. Тихомиров.** *Экологические характеристики перевозимых  
грузов как основа экологической безопасности международных  
транспортных коридоров ..... 55*

**Г.Т. Фрумин, Аль Мурейш Халед Абдо Сауд Али.**  
*Проблема водообеспечения в Республике Йемен: современное состояние и пути решения* ..... 57

### МОРСКАЯ ТЕХНИКА: НАУКА И ТЕХНОЛОГИИ

**Б.А. Царев.** *Анализ логики открытий, объясняющих стабильное устройство Вселенной* ..... 60

**К.В. Фролов.** *О формировании теории аналитического проектирования* ..... 67

**Ш.Г. Алиев.** *К элементам стартового проектирования подводных комплексов* ..... 69

**Б.М. Сахновский.** *Особенности проектного обоснования модернизации судов внутреннего и смешанного плавания* ..... 71

**А.Ш. Ачкинадзе.** *Выдающийся ученый-гидродинамик В.М. Лаврентьев* ..... 78

**К.Е. Сазонов.** *Проводка крупнотоннажных судов ледоколами в условиях сжатия льда* ..... 83

**В.Н. Киреев, В.А. Мацкевич, Ю.И. Рязанцев.**  
*Особенности расчета нагрузки масс по рабочим чертежам* ..... 87

**В.Н. Киреев, В.А. Мацкевич, Ю.И. Рязанцев.** *Расчет нагрузки масс и водоизмещений судна по измерителям* ..... 91

*К 65-летию профессора В.И. Полякова* ..... 99

### БИЗНЕС И ПРАВО

*К 50-летию Г.Д. Филимонова* ..... 101

**Г.Д. Филимонов.** *Инновационный анализ морского промышленно-транспортного комплекса (судостроение, транспортные системы)* ..... 102

**Л.В. Бронникова.** *Комплексная оценка социально-экономических последствий, связанных с неблагоприятными условиями труда на предприятии* ..... 107

**Н.А. Пономарев.** *Управление производственным потенциалом судостроительного предприятия* ..... 109

**Д.В. Давыдов.** *Предпосылки интеграционных процессов в судостроительной отрасли* ..... 113

**А.В. Зуев.** *Порядок найма капитана морского судна по законам Российской империи* ..... 114

### ИСТОРИЯ СУДОСТРОЕНИЯ И ФЛОТА

**Л.Г. Шустер.** *Северная война и морская торговля России* .... 115

**И.Я. Баскаков.** *Вклад специалистов особых конструкторских бюро в создание «малых охотников» и торпедных катеров постройки СФ «Алмаз»* ..... 119

**И.А. Рябинин.** *К 80-летию адмирала В.Н. Поникаровского* ... 125

**С.П. Сирый.** *К 125-летию А.М. Щастного* ..... 127

### В НТО СУДОСТРОИТЕЛЕЙ

**В.Л. Александров.** *К 75-летию профессора А.Ш. Шауба* .... 131

## CONTENTS

### SHIPBUILDING

- Second destroyer (pr. 956) handed over to China* ..... 1  
*Admiralty yards: delivery of "Tavrichesky bridge" tanker* ..... 7  
*«Admiralty yards» have started construction of the second serial.  
multipurpose torpedo-missile submarine of new generation* ..... 9  
*Escort ship project 20380 for the Russian Navy  
has been laid down*..... 11  
*“Almaz” shipbuilding company: results of activity  
and outlooks for further development* ..... 13  
Major boundary marks of the company’s activity in 2006 and works to be performed  
in 2007 (including foreign orders) has been outlined in the article.

### ENGINES, EQUIPMENT AND CONTROL SYSTEMS

- V.A. Solon'ko, V.N. Kruglevsky, V.A. Kolesnik.** *Fire  
safety monitoring in ship's spaces as an image identification task* ... 15  
The authors consider an approach towards fire safety systems development. They  
propose a mathematical model to be used for the formation of such systems. It is  
based on a procedure that makes it possible to subdivide a set of objects into  
categories and classify images by using feature space segmentation language or projecting  
feature space into the decision space.
- S.A. Ivanov, A.I. Rybnikov.** *Effect of long-time operation  
upon turbine blades fatigue resistance*..... 19  
The analysis of how the structural factor effects the characteristics of industrial  
turbines blades fatigue resistance in the process of long-time operation has been  
carried out. The general pattern and factors causing decrease of blades endurance limit  
and their relationship with changes in the structure condition and principal mechanical  
properties of metal have been considered. It is shown that the principal mechanical  
characteristic that is responsible for the decrease in blades endurance limit after long-  
term operation is represented by metal ductility properties and unscheduled technical  
maintenance makes it possible to increase endurance of blades and prolong age of  
their operation.
- I.O. Prutchikov, V.V. Kamlyuk, V.N. Soldatov,  
V.V. Zorin, N.A. Karelsky, P.V. Krupko.** *Experimental  
research of energy reverse conversion within the guaranteed  
energy supply system equipped with a diesel generator set* ..... 23  
The results of experimental studies that showed the efficiency of energy reverse  
converter with diesel generator integrated into the system are presented in the  
article. The diesel generator-bases experimental plant DX=600TE makes it possible to  
carry out a wide range of research aimed at the implementation of energy reverse  
converter.
- V.N. Vasilenko.** *Modern wiring and keeping traditions* ..... 27  
The article familiarizes with the experience of wiring works performed at “Baltiysky  
Almaz” company, subsidiary of “Balijsky Zavod”.
- D.V. Souslov, N.V. Pyalov.** *On the improvement  
of stabiliser's power drive mechanical units* ..... 32  
The problem of minimizing dimensions and weight of stabiliser's power drives has  
been considered. Special attention is paid to optimal pressure and pump unit design.
- Korabel.ru – search engine (participants of the section)** ..... 36  
**E.V. Korolev.** *Enhancing the efficiency of GOST 26765.52–87  
(MIL-STD-1553B), RS485, CAN trunk lines in ship's  
control systems* ..... 38

Due to the analysis of features and properties applied to network protocols a multi-level unified network protocol with enhanced possibilities in terms of broadcast messages exchange has been developed.

The use of multi-purpose software permits not to use any more dedicated controllers that provide for information exchange function solely. It resulted in a great economical effect due to cut-ting down manufacturing costs.

## SAFETY OF NAVIGATION

### **B.E. Ivanov.** *On safety of navigation using linear ranges* ..... 42

Critical remarks on the proposals made by N.I. Rodichkin (see "Morskoy Vestnik" 2002, № 2, "Notes on hydrographics" 2002, № 254, 2005, № 264) concerning linear navigational ranges calculation. Though his proposals to consider a range horizontal angle as a random value are of some interest recommendations to use mean square root deviation is unjustified.

### **V.P. Hudin, V.E. Salov.** *Simulator of dry bulker cargo handling operations* ..... 46

The article presents TGOS-2006 simulator designed by "Sistemy upravleniya i pribory" Ltd (Control systems and equipment) in cooperation with the CNIIMF. It is designed to be used in the training of cargo-handling crew of sea and river-going dry-bulk carriers and fishing vessels. Special attention is paid to the simulator's functional features that are mostly helpful in training cargo-handling practical skills.

## ENVIRONMENTAL SAFETY

### **S.P. Alekseev, M.V. Bondar, M.I. Sourzhikov.** *Development of protection systems for off-shore oil-and-gas complexes* ..... 51

The statistics on emergency situations that used to arise at foreign oil-and-gas complexes and reasons that caused them have been analyzed. Special attention is paid to offshore oil-and-gas platforms protection systems and their types.

### **A.N. Tikhomirov.** *Ecological characteristics of cargoes as a basis of environmental safety of international transport corridors.* .. 55

The author considers characteristics of dangerous cargoes, rules for their transportation both inside the country and via international transport corridors. Special attention is paid to establishing priorities in the environmental assessment of conditions for such cargoes transportation.

### **G.T. Frumin, Al Mureishi Kholed Abdo Said Ali.** *The problem of water supply in the Republic of Yemen: modern state and possible alternatives* ..... 57

A number of directions for research and construction works that may solve water supply problem in the country is proposed by the authors. Possible ways of sea-water desalination and their economical feasibility.

## MARINE EQUIPMENT: SCIENCE AND TECHNOLOGIES

### **B.A. Tzarev.** *The analysis of logics of inventions that explain stability of Universe system* ..... 60

The author comes back again to the proofs of his own hypothesis about the Universe system. He explains the logic of his inventions basing upon the theory of small mechanical, electromagnetic and thermal fluctuations.

### **K.V. Frolov.** *On the formation of analytical design theory* ..... 67

The article narrates about the establishing of SH.G. Aliev headed Centre of strategical and informational technologies at the Republic of Dagestan Government and its contribution to the development of torpedo weapon.

### **Sh.G. Aliev.** *On the components of underwater complexes start designing* ..... 69

The author considers an alternative of agreeing upon design solutions and customer's requirements while developing new types of naval armament including silent gliding self-propelled autonomous unmanned vehicles.

**Supreme Examination Board Bulletin № 3, May 2004:**

The Morskoy Vestnik magazine is entered on the list of the leading scientific magazines and editions published in the Russian Federation where basic scientific outcomes of doctoral dissertations shall be published.

<b>B.M. Sakhnovsky.</b> <i>Design substantiation of inland and river-sea vessels modernization.</i>	
<i>Special features</i> .....	71
Some features of design substantiation while performing inland and river-sea vessels modernization with the purpose to prolong their age of operation have been analyzed.	
Five possible patterns of modernization have been revealed each having its own design substantiation features that should be taken into consideration. Efficient operation of a vessel being modernized depends upon the decisions taken; and it is possible to increase cargo capacity from 10 to 50%, и profit from 10 30% in comparison with serial vessels.	
<b>A.Sh. Atchkinadze.</b> <i>Prominent scholar in the filed of hydrodynamics – V.M. Lavrentiev</i> .....	78
The article familiarizes with the biography of a prominent expert in hydrodynamics – V.M. Lavrentiev, Doctor of Technical Sciences, Professor who took part in the development of “Norms for sea-going vessels stability” and contributed a lot to the solution of ship’s propulsor calculation. Further the author describes the example of a cavitating propulsor assessment performed by V.M. Lavrentiev and, taking into account results of studying an ideal propulsor that have accumulated recently, makes a number of comments on the problem.	
<b>K.E. Sazonov.</b> <i>Icebreaker pilotage of large vessels in ice-compressing conditions</i> .....	83
The author offers formulas used to calculate such conditions that would provide sailing of large vessels in spite of being ice compressed. They may be used to choose navigational tactics for a ship, define necessary rate of icebreaker support, as well as to provide safety of navigation.	
<b>V.N. Kireev, V.A. Matzkevich, Y.I. Ryazantsev.</b> <i>Features of calculating mass load according to working drawings</i> .....	87
The authors have analyzed a calculation of ship’s mass loads performed according to working drawings and contractor load list and came to an opinion that inclusion of displacement reserve into the working drawings load is not grounded.	
<b>V.N. Kireev, V.A. Matzkevich, Y.I. Ryazantsev.</b> <i>Calculation of ships mass loads and displacements according to analyzers.</i> .....	91
A method of Calculation of ships mass loads and displacements according to analyzers is proposed. Necessary formulas are given and calculation algorithm is described.	
<i>To Professor V.I. Polyakov 65<sup>th</sup> anniversary</i> .....	99

## BUSINESS AND LAW

<i>To the 50<sup>th</sup> anniversary of G.D. Filimonov</i> .....	101
<b>G.D. Filimonov.</b> <i>Innovation analysis of maritime industrial and transport complex (shipbuilding, transport systems)</i> .....	102
Possible structure of potential innovations to be implemented into the development of the Maritime complex of Russia in compliance with the «The Maritime Doctrine of the Russian Federation up to the year 2020» is proposed by the author. Offers made by shipbuilding yards top-managers who consider technological superiority to be the most important competitive advantage have been taken into consideration.	
<b>L.V. Bronnikova.</b> <i>Comprehensive assessment of social and economical consequences connected with unfavourable labour conditions at enterprizers</i> .....	107
An algorithm of comprehensive assessment of social and economical consequences connected with unfavourable labour conditions at enterprizers has been developed. It is based upon a double level approach to the problem.	
<b>N.A. Ponomarev.</b> <i>Management of the shipbuilding plant productive potential</i> .....	109
The article is dedicated to the problems of investment process management at a company regarding its development. A method used to assess the phase of company development, when the investments would be mostly efficient.	
<b>D.V. Davydov.</b> <i>Backgrounds of integration processes in the shipbuilding industry</i> .....	113
The article describes possible ways of shipbuilding enterprises integration: vertical, horizontal and matrix.	
<b>A.V. Zouev.</b> <i>Employment procedure of a sea-going vessel captain in compliance with the Russian Empire legislation</i> .....	114

## HISTORY OF SHIPBUILDING AND FLEET

<b>L.G. Shouster.</b> <i>Northern War and maritime trade in Russia</i> .....	115
Detailed consideration of the stages of maritime foreign trade in Russia after the Northern War and structure of commodity circulation.	
<b>I.Y. Baskakov.</b> <i>Contribution made by special regime design bureaus into the development of Almaz-built “small hunters” and torpedo motor boats.</i> .....	119
The article familiarizes with the history of designing and construction of these motor-boats at the Almaz shipbuilding yard. Many of the talented engineers and designers who participated in the work were subjected to repressions in the 30 –50ties but continued to work in special regime design bureaus.	
<b>I.A. Ryabinin.</b> <i>To the 80<sup>th</sup> anniversary of admiral V.N. Ponikarovsky</i> .....	125
<b>S.P. Siry.</b> <i>To the 125<sup>th</sup> anniversary of A.M. Shchastny</i> .....	127
The article familiarizes with the biography of first-rank captain A.M. Shchastny and his role in the famous Ice Cruise of battle ships and submarines from Helsingfors to Kronshtadt in 1918.	

## NEWS FROM THE SCIENTIFIC-AND-RESEARCH SOCIETY OF SHIPBUILDERS

<b>B.L. Aleksandrov.</b> <i>To the 75<sup>th</sup> anniversary of Professor A. Shaub</i> .....	131
--	-----
